EDUCATION

- **University of California, Berkeley** — Berkeley, CA
  Bachelors of Science in Computer Science; GPA: 3.85 — *Aug. 2011 – Dec. 2015*

EXPERIENCE

- **Color** — Burlingame, CA
  Software Engineer — *Feb 2017 - Present*
  - **Color Provider Platform**: The Color Provider Platform is a web app enabling healthcare providers to order the Color test and get key insights about their patients.
  - **Insurance**: Designed and built a system for accepting healthcare insurance as a payment method. Included a way for patients to check whether they met insurance criteria for genetic testing, as well as whether paying via cash would actually be bottom-dollar cheaper.
  - **SMS Infrastructure**: Designed and built an event-driven system for sending out SMS messages to customers that's now used across the company.
  - **Prescription Pads**: Designed and built a fast way for healthcare providers to order the Color test, enabling them to help their patients get screening without disrupting their already-busy workflows.
  - **Front-end Tooling**: Orchestrated a migration of existing front-end code from AngularJS to React / TypeScript from start to finish.

- **Operator** — San Francisco, CA
  Software Engineer — *Oct 2015 - Jan 2017*
  - **Inventory**: Designed and built a web crawler for indexing inventory available on different ecommerce sites.
  - **Logistics**: Designed and built an internal web app for managing logistics for packages traveling internationally.
  - **Same-day Gifting**: Designed and built a special holiday integration with UberRUSH and Westfield used to launch a special service offering same-day delivery for gifts.
  - **Messenger Integration**: Built out the payments section of a Facebook Messenger integration allowing clients to use Operator without downloading our app.
  - **Agent Console**: A chat app used by outside contractors and internal employees to provide real-time suggestions and support to our clients.
  - **Marketing Pages**: Worked with design and product to continuously iterate on the designs of our external marketing pages.

- **LinkedIn** — Mountain View, CA
  Software Engineering Intern — *Summer 2014*
  - **Portkey**: Designed and built an internal tool to rapidly prototype Hadoop-related workflows. Reduced prototyping time from roughly 30 minutes to 3 minutes.

PROJECTS

- **Scribe**: A mobile app to help you journal.
- **Project Homeless Connect**: Developed a web app to check in clients and upload information to Salesforce, replacing the existing paper form and data entry workflow.
- **Gutter Warnings**: A framework onto an online editor to highlight common CSS mistakes.
- **Food Shift**: Led a team of 5 to build a web app to pair together food donors and food recipients.

SKILLS

- **Languages**: Python, JavaScript, HTML/CSS
- **Technologies**: Django, Flask, React, AngularJS
